VENTURETRACK — EXECUTIVE INTELLIGENCE MEMO

INDIAN STARTUP FUNDING INTELLIGENCE PLATFORM | MINI PROJECT 13

Generated at: 03 November 2026, 05:55:09 UTC | Exchange Baseline: ■83 / USD

1. Macro Ecosystem Metrics

Metric	Value	Metric	Value
Total Tracked Deals	**141**	Active Startups	**131**
Total Capital Deployed	**■59,037.27 Cr**	Average Deal Size	**■464.86 Cr**
Median Deal Size	**■41.50 Cr**	Bengaluru Share (%)	**100.0%**
Above Sector Avg (%)	**29.08%**	Top Funded Entity	**Rapido Bike Taxi (■32,370.00 Cr)**

2. Research Findings & Analytical Interpretation (Task 5)

Empirical evaluation of the 127 disclosed funding rounds reveals profound capital skewness, evidenced by the large disparity between the median deal value of ■41.50 Cr and the mean of ■464.86 Cr. The capital concentration is geographically centered in Bengaluru, with Bengaluru-based ventures alone securing 100.0% of all transaction volume across the ecosystem. Across industry verticals with recurring deal flow, E-Commerce demonstrated the highest capital intensity, registering an average ticket size of ■263.65 Cr. Notably, only 29.1% of total transactions exceed their respective sector's mean funding threshold, confirming that macroeconomic averages are heavily driven by outlier mega-rounds rather than uniform capital deployment. Temporal trajectory indicates that startup deal velocity reached its historical crest in 2018 with 98 announced rounds before consolidating into later-stage, higher-conviction equity financings.

3. Sector Concentration (Top 5 by Capital)

Sector	Deals	Total Capital (■ Cr)	Avg Deal (■ Cr)
Transportation	1	■32,370.00	■32,370.00
Consumer Internet	24	■5,156.35	■214.85
B2B	1	■4,855.50	■4,855.50
E-Commerce	9	■2,372.85	■263.65
Finance	11	■2,089.53	■189.96
